Re: VMRC #16-1420
Final Permit Extension

Dear Mr. Lambert:

This is in response to your request for an extension of the above-referenced permit. Specifically, that permit authorizes you to mechanically maintenance dredge, a maximum 50,000 cubic yards of accumulated sediments on an annual basis, from five (5) flood control channels, Cameron Run, Holmes Run, Backlick Run, Hooffs Run and Four Mile Run, to return them to their original design configurations, in the City of Alexandria.

Your extension request is hereby granted. The new expiration date for the previously authorized work will be January 24, 2027. Please attach this letter to your original permit as verification of this extension. All other terms and conditions of the original permit remain in effect.

Please note that this is the final extension allowable for this permit. Should additional maintenance dredging be warranted after January 24, 2027, a new Joint Permit Application must be submitted and a new permit issued.

Should you have any questions, or if we may be of further service, please do not hesitate to contact Mr. Mark Eversole of my staff at (757) 247-8028 or mark.eversole@mrc.virginia.gov.

Sincerely,

Randal D. Owen
